Course Description and Goals: The pre-doctoral internship is a full calendar year (or two years, half-time) supervised training experience in an approved clinical setting. The internship will include intensive exposure to various professional issues, the opportunity to work with a diverse range of clinical populations and problems, and advanced training in the use of specific psychological assessment and intervention strategies.

Evaluation: This internship will be evaluated on a Credit/Fail basis, based upon the recommendation of the internship staff. In order to facilitate discussion, or to deal with performance that may lead to a recommended failure, an interim evaluation of the student is expected. The internship is a pre-doctoral requirement which must be satisfactorily completed before a student will be authorized to receive a doctoral degree.
